

PRESS RELEASE

Beactica signs five-year framework agreement with global pharmaceutical company

Uppsala, Sweden, 6 March 2018

Beactica, the Swedish company with unique capabilities to evaluate the interactions of molecules, today announced that it has signed a five-year research services agreement with an undisclosed top-five-ranked global pharmaceutical company. The framework agreement outlines the legal terms under which Beactica will provide services related to the characterization of interactions between novel small molecules therapeutics and their target proteins. Financial terms of the agreement were not disclosed.

“We are pleased to again have been selected by a world-leading pharmaceutical company to provide insights on molecular interactions for their prioritized drug discovery programmes”, said Dr Per Källblad, CEO of Beactica. “This is a strong validation of Beactica’s unique position in the industry and also an excellent testimony to our platform capabilities.”

Previously disclosed collaborations with leading pharmaceutical companies include Boehringer Ingelheim, Janssen R&D of Johnson & Johnson and Sanofi.

About Beactica

Beactica AB is a specialist drug discovery company, utilising its proprietary methodologies to evaluate the interactions of molecules in order to generate novel therapeutics. As well as progressing its own drug discovery programmes in areas of unmet medical need, Beactica offers partnerships for fragment-based lead generation using its proprietary discovery platform. Founded in 2006 based on research carried out at Uppsala University, Beactica has established a reputation as a world-leader in fragment-based drug discovery using SPR biosensor technology. For more information on Beactica, please visit www.beactica.com.
